Arindam Paul

Contact Information

1021 Dempster Street
Apartment 3W
Evanston, IL 60208 USA

Phone: (440) 622-1087
E-mail: arindam.paul@eecs.northwestern.edu
Website: www.arindampaul.me

Interests

Machine Learning, Deep Learning, Natural Language Processing, Materials Informatics, Cheminformatics

Programming Skills

Programming: Python, MATLAB, R
Data Science: Keras, Tensorflow, PySpark, Scikit-Learn, RDKit, Gensim, NLTK, Pandas, Numpy, Seaborn, Matplotlib, Theano, PyTorch
Web Development : HTML/Markdown, CSS, JavaScript, Ruby On Rails

Education

Northwestern University, Evanston, Illinois

Ph.D. Candidate, Computer Engineering (Expected graduation date: Jul 2019.)
Advisors: Prof. Alok Choudhary, Prof. Ankit Agrawal

Northwestern University, Evanston, Illinois

Master of Science, Computer Science, Summer 2014

Birla Institute of Technology & Science, Pilani, Rajasthan India

Master of Engineering (Hons.), Software Systems, May 2012
- Dissertation: Designing an efficient Distributed Computing Solution for Data Mining

Birla Institute of Technology & Science, Pilani, Rajasthan India

Bachelor of Engineering (Hons.), Chemical Engineering, Dec 2009
- Thesis: Detecting Sybil Attacks in P2P networks using Psychometric Analysis

Research Experience

Northwestern University, Evanston, Illinois USA

Research Assistant **Fall '12 - present**

Ensemble Nets on Mixed Representations for Chemical Property Prediction (Tensorflow, Keras) **Sep '18 -**
- Created CheMixNet - a deep neural network that combines molecular fingerprints to develop a generalized architecture for chemical property prediction
- Designed SINet - a deep network that combines two different textual representations SMILES and InChI for predicting chemical pro
- Expanded SINet for transfer learning tasks from a 2.3 million dataset to a smaller dataset
- Developed ChemsembleNet - a deep network that combines different textual, molecular fingerprints and molecular graph representations of molecules to achieve better results than individual representations

Deep Learning-based Predictive Model for Additive Manufacturing (Tensorflow, Keras) **Nov '16 -**
- Created Hidden Markov models for time series analysis of heat flux data
- Investigating Recurrent Neural Network models to predict point-wise temperature information for accelerating additive manufacturing simulations

Solar Cell Efficiency Prediction using Molecular Fingerprints (Tensorflow, Scikit Learn) **Mar '16 -**
- Designed Deep Neural Network and Random Forest models for predicting power conversion efficiency of solar cells using chemical fingerprints, and achieved mean square percentage error between 1.5-2 %
- Designed an online application for material scientists to get an estimation of power efficiency

Very Deep Neural Networks for Predicting Formation Stability (Tensorflow) **Mar '16 - Sept '17**
- Constructed Neural Network Models with 18-25 layers to predict formation energy of a chemical compound
- Attained 20 % higher accuracy than the state-of-the-art models using Random Forests that would allow domain scientists to explore millions of possible compounds

Ensemble Learning-based Guided Optimization for Aircraft Design (MATLAB, Python) **Oct '15 - Dec '17**

- Created intelligent sampling algorithms to explore the constrained search space for candidate microstructures
- Developed Feature Ranking-based Technique for Search Space Reduction of Constrained Non-Convex Optimization
- Achieved 100x candidate microstructures compared to state-of-the-art methods that can accelerate the design-to-experiment life-cycle

Convolutional Neural Nets for Thematic Image Classification in Pinterest(Torch) **Oct '15 - Sep '16**

- Harnessed Association Rule Mining for thematic label curation
- Developed ConvNet Models for hierarchical classification that led to automated image categorization based on themes

Classification of Anonymous Posts using Recurrent Neural Networks (Tensorflow) **Jan '15 - May '16**

- Generated vectorizer models using Word2vec trained on crowd-sourced (Urban Dictionary) & psycholingual (LIWC) dictionaries (Gensim)
- Attained prediction accuracy of 79.8 % and 78.1 % using LSTMs and ensemble models respectively

Facebook Confessions & Yik Yak **Jun '14- Dec '14**

- Studied question asking about sensitive topics in anonymous forums
- Designed a system to automatically identify and classify taboo posts in anonymous forums with good accuracy

Learning from Ads:Reverse-engineering demographics and interests **Feb '13-May '14**

- Created synthetic user profiles with different demographic and interest features and collecting ad traffic
- Created a model by using cross-validation which can predict user features from resulting data-set and ground-truth
- Application of the model to cellular web-data to predict user's demographics and interests on-the-fly

Graduate Researcher **Spring '10 - Spring '12**

Designing an efficient Distributed Computing Solution for Data Mining **Fall '11 -Spring '12**

- Created a Beowulf Linux(Ubuntu) cluster using OpenMPI library project
- Implemented parallel implementation of K-means for OpenMPI
- Bench-marked sequential and parallel OpenMPI implementations of K-means clustering algorithm
- Compared the performance with the control Hadoop cluster

Preventing Sybil attacks in P2P systems using Psychometric Tests **Fall '09 - Spring '11**

- Suggested a novel approach to use Psychometric Tests (Luscher Color Test and Myers Briggs Type Indicator Test) to evaluate psychometric index of users
- Cluster nodes with similar scores and in case of a particularly high-frequency zone, we treat these nodes as suspicious and further use CAPTCHAs to remove false positives.

Software Quality Evaluation using Fuzzy Multi-Criteria Approach **Spring '10- Spring '11**

- Employed fuzzy ratings and weights to software attributes and proposed a comprehensive model for calculating overall software quality based on ISO/IEC 9126 model.
- Tested on multiple university softwares and one industrial application.

Teaching Experience

Northwestern University, Evanston, Illinois USA

Teaching Assistant **Winter & Spring '14, Winter & Fall '15**

Assisted the instructor in teaching the following undergraduate level courses. Duties included sharing of responsibilities for lectures, exams, homework assignments, grades, office hours and leading computer lab exercises.

- EECS 510 Social Media Mining, Spring '17 & '18
- EECS 214 Data Structures and Data Management, Fall 2015

- EECS 110 Introduction to Computer Programming (Python) , Winter & Spring 2014, Winter 2015

Guest Lecturer **Spring '16**

EECS 510 Social Media Mining

- Impact of "likes" and "reactions" on social media
- Anonymity in Social Media
- Crawling and scraping the web

Instructor **Summer '16**

MGLC Transferable Skills Workshop on Machine Learning

Attended by McCormick Graduate students and faculty

- What and Why of Machine Learning ?
- Algorithms
- Application
- Introduction to Deep Learning

BITS Pilani, Rajasthan, India

Teaching Assistant **Jan - May '12**

Assisted the instructor in teaching the following undergraduate level courses. Duties included sharing of responsibilities for exams, homework assignments, grades and leading computer lab exercises.

- CS/IS 332 Introduction to Database Systems and Application, Spring 2012.

* = co-first author

PROFESSIONAL EXPERIENCE

Northwestern Mutual Life Insurance, Milwaukee, Wisconsin

Machine Learning Intern **Jun '18 - Aug '18**

- Developed distributed image to text conversion algorithms for detecting responses from scanned questionnaires
- Designed a noise reduction algorithm to denoise scanned and photocopied questionnaires

EDT, New York City, New York

Data Science Consultant **Nov '16 -**

- Provided subject matter expertise to develop algorithms for topic mining on legal documents
- Assisted in designing models for profanity detection from company-wide email database

Narus Inc. - A Boeing Company, Sunnyvale, California

Summer Research Intern **Jun '13 - Sep '13**

- Understanding Collaboration Among Online Advertising and Analytics Services
- Observed multiple 3rd-party services sharing user's information with each other
- Investigated how these services use means to obfuscate parameter sharing

Awards & Honors

- McCormick Dean's Commendation Fellowship, during 6th year of PhD (2017-2018)
- Predictive Science and Engineering Design Fellowship, during 5th year of PhD (2016-2017)
- Segal Design Cluster Fellowship, during 3rd year of PhD (2014-2015)
- Walter P. Murphy Fellowship, during 1st year of PhD (2012-2013)
- BITS Pilani Merit-cum-Need Scholarship during undergraduate study
- Among 10 doctoral students across Northwestern selected for summer-long Research Communication Workshop, 2016
- Best TA award for recognition of teaching excellency as Teaching Assistant for Database Systems and Applications (BITS Pilani 2012)
- All India Rank 1 in BITS HDSAT (admission test for graduate programs at BITS Pilani) in Software Systems
- All India Rank 64 & State Rank 9 in National Science Olympiad among more than half million participants during freshmen year of high-school

Leadership

- President and Treasurer , Northwestern Toastmasters Club (2015-16, 2016-17)
- President and Founding Member, Northwestern Creative Writing Club
- President, Northwestern University Cricket Club
- Co-Facilitator, Northwestern Dialogue Group
- Mentor, Brave Initiatives (http://www.braveinitiatives.com/)

Selected Course & Side Projects

- Developed a Sentiment Analysis Tool to find the most interesting or controversial events at the 2014 Golden Globe Awards from user-Tweets (Python) **Spring '14**
- Developed a web application to track a portfolio of a user's stocks. Used data mining techniques to analyze and predict stock and portfolio performance using historical data. (Perl, SQL) **Fall '12**
- Developed a real-time tool starts an alarm when a designated bus is 'x' (customizable) min away from the closest bus stop by scraping CTA bus tracker webpage (Python). **Fall '14**.
