

SUMMARY	Computer Scientist working in Machine Learning with 10+ years of research experience.		
INTERESTS	Machine Learning, Deep Learning, Natural Language Processing		
EDUCATION	Northwestern University , Evanston, Illinois USA		
	Ph.D., Computer Science		Sep '19
	Master of Science, Computer Science		
	Birla Institute of Technology & Science , Pilani, Rajasthan India		
	Master of Engineering, Software Systems		May '12
	Bachelor of Engineering, Chemical Engineering		
PROGRAMMING SKILLS	Proficient: Python, Keras/Tensorflow, Scikit-Learn, Dash/Plotly, Matplotlib/Seaborn, Pandas, FastAI, XGBoost/LightGBM, Shapley, NLTK, Gensim, Selenium Familiar: OpenCV, Spacy, PySpark, PyTorch, R, MATLAB, C, C++, Java, LAMP, SQL, weka, HTML/CSS		
PROFESSIONAL EXPERIENCE	<i>Machine Learning Scientist</i> , American Family Insurance , Madison, Wisconsin		Oct'19-
	<ul style="list-style-type: none">• Designing insurance-based language models for predicting claims fraud• Developed SARIMAX, LSTM and ESRNN forecasting financial metrics for next calendar year• Develop a machine learning system for estimating motor vehicle violation risk		
	<i>Data Science Intern</i> , Northwestern Mutual , Milwaukee, Wisconsin		Jun - Aug '18
	<ul style="list-style-type: none">• Developed distributed OCR algorithms for detecting responses from scanned questionnaires• Designed a noise reduction algorithm to de-noise scanned and photocopied questionnaires		
	<i>Research Intern</i> , Boeing Cybersecurity , Sunnyvale, California		Jun - Sep '13
	<ul style="list-style-type: none">• Generated synthetic user profiles with different demographic and interest features for analyzing ads across profiles• Developed a machine learning model for predicting user demographics and interests from ads		
RESEARCH PROJECTS	<i>Research Assistant</i> , Northwestern University , Evanston, Illinois		Sep '12 - Aug'19 -
	<ul style="list-style-type: none">• Chemical Property Prediction using Molecular Fingerprints (Tensorflow, Scikit Learn)<ul style="list-style-type: none">◊ Developed a multi-input input neural network architecture by merging different molecular representations (SMILES and fingerprints) for predicting chemical properties and reduced the mean absolute error by half compared to state-of-the-art architectures (CheMixNet architecture)◊ Designed Bagged Ensemble models for predicting power conversion efficiency of solar cells using chemical fingerprints, and achieved mean absolute percentage error between 1.5-2 %◊ Developed a transfer learning solution to predict solar cell properties with mean absolute percentage error below 1 % (SINet architecture)• Developed Predictive Model for Additive Manufacturing (Tensorflow, Keras)<ul style="list-style-type: none">◊ Created time series models for temporal analysis of temperature and heat flux data◊ Investigated Recurrent Neural Network models to predict point-wise temperature information for accelerating additive manufacturing simulations◊ Developed an iterative real-time predictive model using bagged decision trees• Ensemble Learning-based Guided Optimization for Aircraft Design (MATLAB, Python)<ul style="list-style-type: none">◊ Created intelligent sampling algorithms to explore the constrained search space for candidate microstructures◊ Developed Feature Ranking-based Technique for Search Space Reduction of Constrained Non-Convex Optimization◊ Achieved 100x more solutions compared to state-of-the-art methods that can accelerate the design-to-experiment life-cycle• Classification of Anonymous Posts using Recurrent Neural Networks (Keras, Scikit Learn)<ul style="list-style-type: none">◊ Developed customized vector model using crowd-sourced (Urban Dictionary) & psycho-lingual (LIWC) dictionaries◊ Explored Word2vec, GloVe and FastText embedding schemes (Gensim)◊ Attained prediction accuracy of 79.8 % and 78.1 % using ensemble and LSTM models respectively

FELLOWSHIPS

McCormick Dean’s Commendation Fellowship	’18 Spring
Predictive Science and Engineering Design Fellowship	’16-’17
Segal Design Fellowship	’14-’15
Walter P. Murphy Fellowship	’12-’13

SELECTED TEACHING AND LEADERSHIP

<i>Teaching Assistant & Guest Lecturer, Northwestern University</i>	Jan’14- Jun’19
<ul style="list-style-type: none"> ◊ Prepared and delivered weekly lectures for 20-50 students ◊ Courses: Social Media Mining, Data Structures , Introduction to Programming (Python) 	
<i>President/Vice-President/Treasurer, Northwestern Toastmasters</i>	Sep ’15 -May ’18
<ul style="list-style-type: none"> ◊ Lead the Northwestern chapter of Toastmasters with over 30 graduate students, post doctoral fellows from 10 different departments ◊ Co-wrote proposal to The Graduate school and obtained 3000 USD to fund programming 	
<i>Co-Facilitator, Northwestern Dialogue Group</i>	Oct ’16 - Sep ’17
<ul style="list-style-type: none"> ◊ Facilitated dialogue in safe spaces for cultural exchange across international and domestic students ◊ Organized social events to enhance group cohesion
